

**Pennant**

## Wiring Boards

Pennant has developed a suite of free standing Wiring Board Trainers:

- ✔ Aircraft is a basic aviation electrical installation principles trainer,
- ✔ Automotive / Marine replicates typical automotive and marine environment circuits using industry standard wire types, connectors and terminations,
- ✔ Domestic / Industrial is a basic electrical installation principles trainer.

These trainers enable the student to undertake a range of cable harness manufacturing and testing practices. Students gain experience in the use of common range of electrical test equipment by the testing and fault diagnosis of cable harnesses.
